Professional Profile

Experienced Web Developer seeking permanent role. Skilled in delivering quality projects on time, effective communication, and quick adaptation to new tech. Proactive problem-solver with a strong work ethic, eager to contribute positively and learn.

Career Summary

Software Developer

Hellenic Ministry of Public Order and Citizen Protection

11/2016-04/2024

RESPONSIBILITIES

- Collaborated within a team environment, utilizing Git commands and version control practices to facilitate seamless collaboration, code integration, and project management across development cycles.
- Sustained legacy web APIs, developed with JSP (JavaServer Pages) and JSX, catering to the needs of federal offices, ensuring ongoing functionality and compatibility with evolving requirements and standards.
- Managed the maintenance and creation of schemas within Oracle databases, leveraging PL/SQL and packages to ensure efficient data management and integrity. Specifically, focused on schemas utilized for expenditure and staff payments, ensuring accuracy and compliance with organizational financial processes and regulations.
- Employed Unix scripts to execute payment processes efficiently, automating tasks and ensuring timely and accurate disbursement of funds in accordance with established protocols and schedules.
- Spearheaded the development of new projects utilizing Spring Boot for backend functionality and Thymeleaf for frontend presentation, leveraging modern technologies to create robust and user-friendly web applications.
- Provided service desk support for self-developed programs, diagnosing and resolving escalated incidents from other support lines. This was executed across role-driven projects tailored to specific specifications.
- Standards Committee for the Competition for the Greek Police and Ministry of Citizen Protection Websites:
 - a. Led the standards committee for the competition to revamp the Greek police website (www.astynomia.gr) and the citizen protection website (www.minocp.gov.gr).
 - b. Collaborated with team members to establish criteria for the competition and evaluate submissions.
 - c. Ensured compliance with industry standards for website accessibility, security, and user experience.
